Using the Resend Option for Partial Panoramic Images

INTRODUCTION

The Resend option retrieves the last acquired image from the buffer inside the CDR Sensor and displays it in an empty viewbox that you select.

This feature is appropriate when a corrupted image, caused by improper data transfer, is displayed on a system that otherwise appears to be operating properly. In this instance, it may be possible to retrieve an uncorrupted version of the image directly from the Sensor without having to expose the patient to additional X-rays.

USING THE RESEND OPTION WITH CDR DICOM

An example of using the Resend feature is provided below.

1. After taking a panoramic X-ray, a corrupted image is displayed.
2. Do not close CDR DICOM as this will clear the image in the Sensor.
3. Locate the Resend option on the Panoramic property page (in CDR DICOM, select System > Panoramic Settings, for example).
4. Mark the Resend checkbox and click Apply.
5. Click OK to close the property page OK.
6. Click on an empty viewbox.
7. Click Yes to the message, "Do you want to resend the last acquired image?"
8. The uncorrupted image appears in the selected viewbox. The Resend checkbox is cleared automatically after this function is used.

USING THE RESEND OPTION WITH TWAIN

An example of using the Resend feature is provided below:

1. After taking a panoramic X-ray, a corrupted image is displayed.
2. Do not close the TWAIN application (in this case, the TWAIN driver in CDR DICOM is being used) as this will clear the image in the Sensor.
3. Click on the Panoramic Settings property page and locate the Resend option.
4. Mark the Resend checkbox and click Apply. Click OK to close the property page.
5. Click on an empty viewbox.
6. Click Yes to the message, "Do you want to resend the last acquired image?"
7. The uncorrupted image appears in the selected viewbox. The Resend checkbox is cleared automatically after this function is used.

**USING THE RESEND OPTION WITH EAGLESOFT OR PATTERSON IMAGING**

Additional steps are needed to access the Schick panoramic property page when using the Resend function in either the EagleSoft or Patterson Imaging programs.

If you require assistance, customers in the United States can contact the Patterson Technology Center at 877-498-6505. Outside the United States, please contact the authorized dealer for Schick Technologies products in your country or region.
